In Conclusion. In conclusion, don't use !important declarations unless you've tried everything else first, and keep in mind any drawbacks. If you do use it, it would probably make sense, if possible, to put a comment in your CSS next to any styles that are being overridden, to ensure better code maintainability.

When you use a percentage in CSS, it has to be a percentage of something. Margins (and padding) set using percentages will always be a percentage of the inline size (width in a horizontal writing mode) of the parent. This means that you will have equal-sized padding all the way around the element when using
